

MSc Medical Research Methodology

A year of intensive study, leading to a MSc from the largest Medical School in Greece

Aristotle University
of Thessaloniki

Medical School

Short
Duration

Blended
Form

English
Language

Competitive
Fees

THE MAIN FEATURES

Main aim of the course is the training of a wide spectrum of scientists on cutting-edge methodologies and technologies that will assist them in planning and conducting research programs, thus advancing their academic and professional career.

Short duration From February until January (12 months), the students will complete a 75-ECTS program that includes six modules.

Blended form Combination of onsite and online learning, to allow optimal time management. Only three weeks of onsite teaching (one week in February, one in April and one in June) to ensure minimal physical presence.

English language To ensure an international group of distinguished tutors and an international class of fellow students, all modules are held in English.

Competitive price Fees are paid in three divided doses, making this MSc an attractive and affordable option for busy professionals.
