

UNBOUND PROMETHEUS PROGRAM OF SUMMER SEMINARS
KAVALA, GREECE, JULY 18th-24th, 2021

CALL FOR SCHOLARSHIP APPLICATIONS

Unbound Prometheus (www.unboundprometheus.com), one of the top summer programs in Europe offering seminars in the forefront of academic research, is pleased to open a call for partial and fully-funded scholarships to members of the academic community in Greece.

The *Unbound Prometheus* program was initiated in 2017 by a group of Greek academics in the US and is managed as an academic cooperative from our headquarters in New York. Our previous programs have offered seminars taught by faculty coming from **Ivy League** schools such as Harvard and Yale, who have done **TED Talks**, have published books among the **NY Times Bestseller list**, and have been selected among the **Best 300 Professors** in the US (by the *Princeton Review*). The 2021 program takes place in Kavalan during the week of July 18th-24th.

Student evaluations we have distributed in the past rate the program, both on its academic and non-academic aspects, above 90% characterizing it as *Very Good* or *Excellent*, reflecting the quality of our faculty and the high organizational standards we have achieved. To read student evaluations, please visit: <http://unboundprometheus.com/program-photos-and-testimonials>

SCHOLARSHIPS

Full scholarships will cover lecture attendance, hotel accommodation (double occupancy), two meals a day, and the scheduled excursion. Partial scholarships will cover half of the tuition fees which are \$1500 for onsite attendance and €500 for those attending online. Transportation expenses to and from Kavala will be the responsibility of each successful applicant.

Who can apply: Preference will be given to undergraduate and graduate students registered in any Greek university but we also welcome applications from faculty and practicing doctors. The 2021 competition is limited to those whose academic field is Medicine, Bio Medical Engineering/Medical Technology, and Pharmacology. The 2021 seminars are:

SURGICAL ROBOTICS: THEORY AND APPLICATIONS

PROF. CHRISTOS BERGELES, KING'S COLLEGE, LONDON

COST-EFFECTIVENESS MODELLING IN THE PHARMACEUTICAL INDUSTRY

PROF. MAARTEN POSTMA, UNIVERSITY OF GRONINGEN, NETHERLANDS

SPINAL CORD INJURIES: PATHOLOGY, STRATEGIES FOR REPAIR, NEURO-MODULATION & CURRENT RESEARCH ADVANCES

DR. ELENI SINOPOULOU, UNIVERSITY OF CALIFORNIA-SAN DIEGO

Application materials: Each applicant should send us in a single PDF file a copy of his/her family's most recent tax return and, in the case of student applicants, a university transcript showing their Grade Point Average (GPA). Applicants should also specify whether they wish to apply for online vs onsite attendance of the seminars. Recipients of scholarships will be selected based on a ranking that takes into account household income and academic performance. Successful applicants will also have to take a short test proving proficiency in the English language. Such test may not be necessary if the professor and all students in a given seminar speak Greek. Interested parties should send applications to: info@unboundprometheus.com

Application deadline: There is no set application deadline but applicants should express interest and send applications as soon as possible.

Those interested in more information and particulars about the 2021 program should visit our website: www.unboundprometheus.com

A note on the coronavirus: While no one can predict how long the problems with travel and large gatherings will last, we expect that the ongoing vaccination process will be advanced enough to allow the program to take place in July. However, we will be monitoring the situation closely and take decisions accordingly.
